

1. Responsive Student Management Portal Using Bootstrap 5

Design and develop a **Responsive Student Management Portal** using HTML, CSS, and Bootstrap 5 to manage student information through an intuitive and mobile-friendly interface. The portal should include features such as student registration, profile management, dashboard statistics, and contact forms. The website must be responsive across different devices and utilize Bootstrap components effectively to create a professional user experience

Page 1: Home Page

Header Section

Create a responsive navbar containing:

- College Logo
- Home
- About
- Courses
- Contact
- Login Button

Bootstrap Components:

- Navbar
- Dropdown Menu
- Buttons

Hero Section (The first prominent section visible after the navbar)

Display:

- Welcome Message
- College Description
- Register Now Button

Bootstrap Components:

- Container
- Typography
- Buttons

Features Section (A section that highlights key services, features, or functionalities)

Display three cards:

1. Student Registration
2. Attendance Management
3. Results Management

Each card should contain:

- Image
- Title
- Description
- Learn More Button

Bootstrap Components:

- Cards
- Grid System

Footer

Display:

- Copyright Information
- Social Media Links

Page 2: Student Registration Form

Fields

- Full Name
- Roll Number
- Email
- Mobile Number
- Gender
- Branch
- Date of Birth
- Address
- Upload Photo
- Terms and Conditions Checkbox

Validation

- Required fields
- Proper email format
- Mobile number length

Bootstrap Components

- Forms
- Input Groups
- Buttons
- Form Validation Classes

Page 3: Student Dashboard

Dashboard Layout

Display:

Statistics Cards

- Total Students
- Present Students
- Absent Students
- Placements

Student Table

Roll No Name Branch Attendance

Features

- Search Box
- Responsive Table

Bootstrap Components

- Cards
- Tables
- Grid System
- Badges

Page 4: Student Profile

Profile Card

Display:

- Profile Image
- Name
- Roll Number
- Branch
- Email
- Mobile Number

Bootstrap Components

- Card
- Images
- Buttons

Page 5: Contact Us

Fields

- Name
- Email
- Subject
- Message

Bootstrap Components

- Forms
- Buttons
- Alerts

Additional Bootstrap Components to Use

Mandatory

1. Navbar
2. Grid System
3. Typography
4. Buttons
5. Cards
6. Forms
7. Tables
8. Alerts
9. Badges
10. Dropdown
11. Collapse
12. Accordion
13. Modal
14. Carousel

Responsive Requirements

Mobile (<576px)

- Single-column layout
- Collapsible navbar

Tablet (≥768px)

- Two-column layouts where applicable

Desktop (≥992px)

- Multi-column layouts

Submission Requirements

1. Source Code Folder
2. Screenshots
 - Home Page
 - Registration Form
 - Dashboard
 - Mobile View
3. GitHub Repository Link
4. README File

Bonus Tasks**Task 1**

Add Dark Mode using Bootstrap utilities.

Task 2

Create a Student ID Card using Bootstrap Card.

Task 3

Create a FAQ Section using Accordion.

Task 4

Display announcements using Bootstrap Alerts.

2. Online Course Registration Portal

Develop a responsive web application for a training institute where students can view available courses and register online. The website should provide course information, registration facilities, and contact details.

Functional Requirements

Page 1: Home Page

Navbar

Include:

- Institute Logo
- Home
- Courses
- About
- Contact
- Login

Hero Section

Display:

- Institute Name
- Tagline
- Brief Introduction
- "Explore Courses" Button
- Background Image/Banner

Featured Courses Section

Display at least 6 courses using Bootstrap Cards.

Each card should contain:

- Course Image
- Course Name
- Duration
- Fee
- View Details Button

Testimonials Section

Display feedback from 3 students.

Footer

Include:

- Address
- Phone Number
- Email
- Social Media Links

Page 2: Courses Page

Display all available courses.

Suggested Courses:

- Web Development

- Python Programming
- Data Science
- AI & Machine Learning
- Java Programming
- Cloud Computing

Use:

- Cards
- Grid System
- Buttons

Page 3: Registration Page

Create a registration form with:

- Student Name
- Email
- Mobile Number
- Gender
- Course Selection
- Qualification
- Address
- Upload Resume
- Terms & Conditions

After submission display:

- Success Alert

Page 4: About Us

Include:

- Institute History
- Vision
- Mission
- Faculty Details

Display faculty information using cards.

Page 5: Contact Us

Include:

- Contact Form
- Google Map Placeholder
- Address Information

Bootstrap Components Required

- Navbar
- Cards
- Forms
- Buttons
- Alerts
- Modal
- Carousel
- Grid System

GitHub Tasks

1. Create Repository
2. Push project files
3. Create README.md
4. Add screenshots
5. Maintain minimum 5 commits

3. College Event Management System

Develop a responsive website for managing college events where students can view upcoming events, register for events, and view event schedules.

Functional Requirements

Page 1: Home Page

Navbar

Include:

- Home
- Events
- Gallery
- Registration
- Contact

Hero Section

Display:

- College Event Banner
- Event Highlights
- Register Now Button

Page 2: Events Page

Display at least 6 events using cards.

Example:

- Technical Quiz
- Hackathon
- Poster Presentation
- Coding Contest
- Project Expo
- Cultural Fest

Each card should contain:

- Event Image
- Event Name
- Date
- Venue
- Register Button

Page 3: Event Registration

Form Fields:

- Student Name
- Roll Number
- Branch
- Email
- Mobile Number
- Event Selection

After registration display:

- Success Message

Page 4: Event Schedule

Create a responsive table.

Time Event Venue

Use:

- Table
- Table-striped
- Table-hover

Page 5: Gallery

Display event photographs using:

- Cards
- Responsive Images
- Grid Layout

Page 6: FAQ

Create FAQ section using Accordion.

Example:

- How to register?
- Is there a registration fee?
- Can I participate in multiple events?

Page 7: Contact

Include:

- Contact Form
- Coordinator Details
- Social Media Links

Bootstrap Components Required

- Navbar
- Carousel
- Cards
- Forms
- Tables
- Accordion
- Alerts
- Buttons
- Grid System
- Modal

GitHub Tasks

1. Create repository named college-event-management
2. Push code regularly
3. Maintain at least 5 meaningful commits
4. Create README.md with:

- Project Overview
- Screenshots
- Technologies Used
- GitHub Repository Link

4. Personal Portfolio Website

Create a professional personal portfolio website to showcase your profile, skills, projects, achievements, and contact information.

Functional Requirements

Section 1: Home

Display:

- Profile Photo
- Name
- Designation
- Short Introduction
- Resume Download Button

Section 2: About Me

Include:

- Educational Details
- Career Objective
- Personal Interests

Section 3: Skills

Display technical skills using:

- Progress Bars
- Skill Cards

Example:

Skill	Proficiency
HTML	90%
CSS	85%
Bootstrap	80%
JavaScript	75%

Section 4: Projects

Display at least 4 projects.

Each project card should contain:

- Project Title
- Project Description
- Technologies Used
- GitHub Link

Section 5: Achievements

Include:

- Certifications
- Workshops
- Internships

- Awards

Use cards or timeline layout.

Section 6: Contact

Create a contact form with:

- Name
- Email
- Subject
- Message

Bootstrap Components Required

- Navbar
- Cards
- Progress Bars
- Forms
- Buttons
- Modal
- Grid System

GitHub Tasks

1. Create repository named Portfolio
2. Upload source code
3. Maintain commit history
4. Create README with screenshots
5. Add project description
